

## Benefits of Owning a Pramac Straddle Stacker

### **NO LICENCE REQUIRED**

Some companies spend thousands of dollars getting forklift licences and training drivers. With Pramac Straddle Stackers there is no need for this expense as you don't need a licence to operate one.

### **WHISPER QUIET - No noisy machinery!**

Pramac Straddle Stackers are perfect for those who need to work near other staff and customers as they operate very quietly.

### **LOW RUNNING COSTS**

Charge it daily or weekly for just a few cents per charge!  
NO Petrol, NO LPG, NO Diesel and NO burning oil to replace.  
Simply plug the Pramac Straddle Stacker into a standard power outlet via the built-in charger and power cord.

### **NO NASTY FUMES**

Pramac Straddle Stackers do not emit exhaust smoke, fumes or gases like carbon monoxide or carbon dioxide so are pleasant to work around.

### **MINIMAL WEAR COMPONENTS**

Unlike conventional forklifts Pramac Straddle Stackers do not have lots of wear components like engine & steering parts, brake & clutch components, transmission, radiators, differentials etc. Nor do they have spark plugs, ignition points, fan belts, filters, seals and gaskets. With less than 10% of the wearing and moving parts of a conventional forklift, Pramac Straddle Stackers have a much lower ownership cost.

### **CHEAPER MAJOR MAINTENANCE ITEMS**

Forget costs of expensive transmission, engine, brakes and steering. The Pramac Straddle Stacker's main long term wear items are batteries which are only a few hundred dollars every few years and the long lasting wheels which are under \$100.

### **REDUCED CHANCE OF OIL LEAKS**

Enjoy a tidier, cleaner workplace with less oil leaks due to the Pramac Straddle Stacker having only one hydraulic lift function which is generally leak resistant.

### **SAFER**

With better visibility, stability and a locked speed limit for operation, Pramac Straddle Stackers are much safer and produce fewer accidents than conventional forklifts. They are much less likely to cause serious injury or death as they are not prone to tipping over and cannot be driven too fast.

### **REDUCTION IN PRODUCT DAMAGE**

As you are closer to the load and can stand on either side of the mast to see the load, Pramac Straddle Stackers have a lower chance of damaging the product than conventional forklifts.

## LOWER UP-FRONT COST

Pramac Straddle Stackers not only have a much lower operating cost, but are also only around half the purchase price of a conventional forklift.

(ie. New conventional forklift from approx \$25000+gst, New Pramac Straddle Stackers from \$11000+gst)

## EXCELLENT RESALE VALUE

History has shown that walkie stackers have always been in high demand and second hand market prices indicate a lack of availability in supply. They are sought after by consumers wanting to pay between \$5000+gst to \$10000+gst for a second hand unit, which can be up to 25 years old. It is estimated that the Pramac Straddle Stackers will have a retail resale market value of 50% to 75% of their new purchase price after 5 years.

## EUROPEAN HIGH QUALITY

The Pramac Straddle Stackers are fully manufactured in Italy to meet the demands of the world's highest quality market. They have not been assembled in various other countries, using just a few European components. Pramac Straddle Stackers come with a 12 month Manufacturers warranty to give you peace of mind, demonstrating a quality European manufactured product using high quality components.

## STRONG YET LIGHTWEIGHT

At a little over 600kg, Pramac Straddle Stackers can operate with less stress on floor surfaces and floor structure than conventional forklifts. This means they can also be transported or freighted long distances at a much lower cost.

## PORTABLE MATERIALS HANDLING

Due to the Pramac Straddle Stacker's low weight and compact size, it can be easily loaded and transported on the back of trucks and even used with truck mounted tail gates.

## LONG OR SHORT TERM HIRE†

If you don't want to buy a forklift, you can hire a Pramac Straddle Stacker for a day, a week a month, a year or for as long as you require.

## TRY BEFORE YOU BUY\*

To make sure the Pramac Straddle Stacker is the right choice for your workplace, why not hire it for a day? We will refund your days hire cost if you then purchase a Pramac Straddle Stacker.

## RENT TO OWN\*

Own your own Pramac Straddle Stacker from just \$70+gst per week for 4 YEARS & IT'S YOURS!
